## Share A Chair Program

The Share a Chair program is an initiative aimed at expanding therapeutic opportunities to support children's development. The program will allow children and teenagers to develop specific skills within a fun and meaningful format. Access to a wide range of equipment, gives caregivers, parents and children a variety of therapeutic and play experiences.

Equipment will be available for loan periods, (generally one month), allowing children and adults to have access on a temporary basis, either for skill development or for exploration of suitable equipment for future purchase. A range of resources will be available based on the therapist recommendations. With the use of digital technology, families and therapists can browse our library to see what your child might be interested in. Staff and volunteers are available by e-mail or telephone for consultation or advice and to arrange for equipment delivery.

This program would not be possible without the generosity of:

**Western Reserve Junior Service League**

**Ronald McDonald House-NEO**
